Our journey includes revitalizing landscapes with Entire Builders & Engineering, streamlining projects through Entire Logistics, and responding to crises like COVID-19 with ECEP HAN Medical Textile. We evolve to meet global needs, exemplifying purposeful flexibility.

UAE Ecep Han

Trading for good...

AFGHAN MINER

WE MINE WITH YOU & FOR YOU

Partner with us and make sure your future standing in one of the world's largest industry

We are not treating you as a business partner, rather we will treat you as part of ourselves and part of our soul.

GOLD

Gold has been worked in Afghanistan for centuries from many areas including Takhar province in the north and from Ghazni, Zabul, and Kandahar provinces in the south-west of the country. Currently, gold is produced almost solely by artisanal miners working the Samti Placer Deposit in Takhar Province. Gold Deposits and prospects are known in rocks of Proterozoic to Neogene age.

TALC

Talc, or talcum, is a clay mineral, composed of hydrated magnesium silicate with the chemical formula $Mg_3Si_4O_{10}(OH)_2$. Talc in powdered form, often combined with corn starch, is used as baby powder.

NEPHRITE

Nephrite is a variety of the calcium, magnesium, and iron-rich amphibology minerals tremolite or actinolite. The chemical formula for nephrite is $Ca_2(Mg, Fe)_5Si_8O_{22}(OH)_2$. It is one of two different mineral species called jade. The other mineral species known as jade is jadeite, which is a variety of pyroxene.

COAL

Currently, there are more than 113 coal mining regions for easy exploitation has been identified and thousands of extraction sites are active in the north and north-western Afghanistan. ECEP HAN, as a leading trading company in Afghanistan, is active in all extraction sites and can export thousands of tons of high-quality coal to every continent in the world.

EMERALD

Emerald is a gemstone and a variety of the mineral beryl ($Be_3Al_2(SiO_3)_6$) colored green by trace amounts of chromium or sometimes vanadium.

LAPIS LAZULI

Unlike most other gem materials, lapis lazuli is not a mineral. Instead, it is a rock composed of multiple minerals. The blue color of lapis lazuli is mainly derived from the presence of lazurite, a blue silicate mineral of the sodalite group with a chemical composition of $(Na,Ca)_8(AlSiO_4)_6(S,Cl,SO_4,OH)_2$.

A SYMPHONY OF TASTE AND HEALTH!

If you can enjoy life from the depth of your soul, you will have a crush on Harir Saffron and Harir Dried Fruits; feel the hum of the bees, the beauty of nature, the fragrance of inherent beauty, and the taste of the heavens.

HARIR®

Saffron

HAND PICKED ONE BY ONE

01

Cultivation: Saffron comes from stigma of the Crocus sativus flower-mind you, only the stigma. And each Crocus flower has only 3 red stigmas to get 1kg of saffron - you need to harvest 1,50,000+flowers.

02

Labour-intensive: there are delicate. Meaning that the saffron strands need to be individually hand-picked.

03

Climate: The Crocus plant can only grow in specific conditions. Overwatering, excessive sun exposure and extremely cold temperatures are enough to ruin an entire harvest: there flowers are delicate. Meaning that the saffron strands need to be individually hand-picked.

04

Scarcity: Saffron is harvested only once a year, and the blooming period lasts only 2-3 days.

05

HarirSaffron: Our dogma is to do the best when no one is there to see. We believe in constant improvement and never compromise quality for quantity.

Our saffron has been declared "premium" by GOV-MAIL laboratory and "highest quality" by Certified Laboratories of California. Our saffron has won the "superior taste" award from International Taste Institute, Brussels.
